IMPORTANT THINGS TO REMEMBER WHEN CHOOSING A SUSPENSION KIT

- Identify what the vehicle will be used for the majority of the time. E.g. Recreational, constant load, work vehicle etc.
- Are accessories fitted to the vehicle or will they be added in the future (e.g. bull bar, winch, rear tyre carrier, long range fuel tank).
- Never assume the vehicle is at a standard ride height, a previous owner may have modified the vehicle (check for different colour coil springs or extra leafs in the leaf spring pack)
- Be aware if the vehicle has already been fitted with aftermarket or modified springs the new springs may not give the height change expected.
- Always measure the vehicles eye brow height measurement before removing the old springs & when the new springs have been fitted after a test drive.

Need some help selecting your suspension components?

Visit the RAW 4x4 website, www.raw4x4.com.au and use the all new online kit builder to assist you with your suspension kit selection process. With easy drop down boxes for accessory selection and a weight calculator, building your own kit has never been easier.

RAW 4x4
Suspension Kits

If you are considering fitting aftermarket accessories, travelling prolonged periods on corrugated tracks or just want to improve the performance of your 4WD you need to upgrade your suspension.

RAW 4x4 have designed and developed a complete range of heavy duty suspension equipment and tuned these components to our strut and shock absorber range to provide a controlled and comfortable ride.

KITS INCLUDE:

- Leaf springs
- Coil springs
- Torsion bars
- Panhard rods
- Trailing arms
- Shackles
- Pin kits
- U-bolts
- Polyurethane bushes
- Castor bush kits

RAW Nitro range will improve ride quality, reduce body roll & increase vehicle stability and control.

Well suited to the recreational 4WDriver who is looking to lift the vehicle and improve overall suspension performance.

RAW Nitro Max is the heavy weight contender specifically designed for heavy coil sprung & torsion bar vehicles. Nitro Max shocks use a proven truck shock absorber design with highly tuned valving for 4WD applications carrying heavy loads & travel demanding terrain.

Recommend for extra heavy duty applications, long distant touring and mining vehicles.

Predator brings together on road prowess & off road durability into a fast acting monotube design. Manufactured in Australia the Predator delivers that elusive feeling of comfort & control.

If you use your 4WD for day to day running around & off road adventures on the weekend, the Predator is what you are looking for.

BSK KIT COMPONENTS

BSK Kits contain all the suspension components needed to mount leaf springs to a vehicle: shackles, pins kits, polyurethane bushes and u-bolts. To help simplify the ordering process RAW 4x4 have bundled these components together. This listings contain a breakdown of the individual components that make up each kit, in case they need to be ordered separately.

VEHICLE APPLICATION	PLACE ON VEHICLE	APPLICABLE LEAF SPRING	KIT PART NO.	KIT COMPONENTS	COMPONENT PART NO.	QTY /KIT

4WD ACCESSORIES: LOAD RATINGS

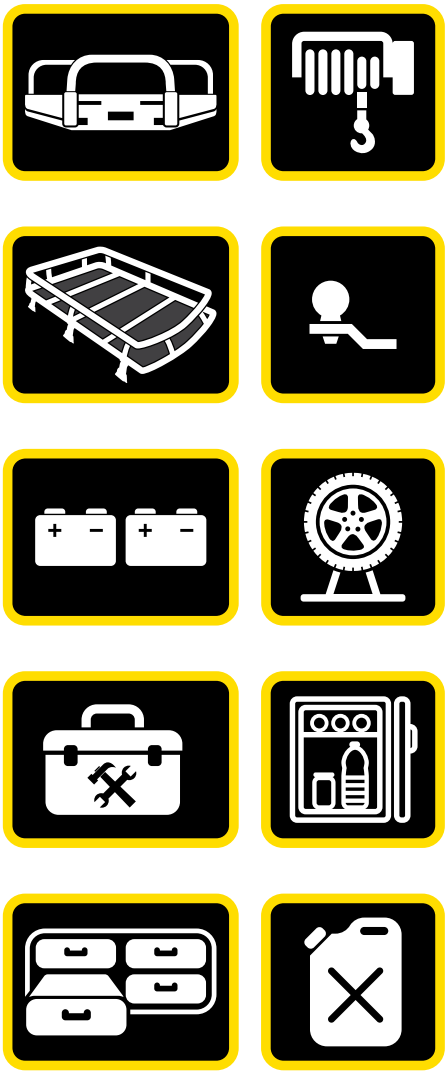

When heading into the outback bull bars, winches and other accessories are essential pieces of equipment to ensure you are ready to handle any challenge that is thrown your way.

When specing up your suspension kit is important that you are aware that these accessories fitted to your vehicle, come with a weight penalty that needs to be compensated by the spring rating to carry the additional load.

The adjacent table outlines the additional weight that each accessory adds to your vehicle, assisting us to select the right spring and shock combination for your specific application.

It is important to note that when specing up the springs, the total weight calculated is based on accessories currently fitted to the vehicle not what you plan on fitting in the future.

PLEASE NOTE: The weights specified in this table are approximate and are to be used as an indicative guide only. Different makes and models of accessories will have different weights. If you are unsure of your accessories it is recommended that you weigh your vehicle to be sure.

ACCESSORY	TYPE	WEIGHT
Nudge Bar	Vehicle Protection	14 kg
Bull Bar (Aluminium)	Vehicle Protection	40 kg
Standard Bull Bar (Steel)	Vehicle Protection	50 kg
Heavy Duty Bull Bar (Steel)	Vehicle Protection	65 kg
Side Bar	Vehicle Protection	16 kg
Side Step (Steel)	Vehicle Protection	40 kg
Rear Bar (Aftermarket)	Vehicle Protection	50 kg
Winch (Synthetic Rope)	Winches	25 kg
Winch (Steel Cable)	Winches	45 kg
Roof Tray (Steel) Full Length - Empty	Roof Top	60 kg
Roof Tray (Alloy) Full Length - Empty	Roof Top	30 kg
Roof Top Tent	Roof Top	70 kg
Underbody Guard (Front)	Underbody Guards	13 kg
Underbody Guard (Transmission)	Underbody Guards	10 kg
Underbody Guard (Sump)	Underbody Guards	7.5 kg
Underbody Guard (Transfer)	Underbody Guards	10 kg
Awning	Other Accessories	12 kg
Recovery Jack	Other Accessories	16 kg
HD Recovery Kit	Other Accessories	20 kg
Second Battery	Other Accessories	30 kg
Driving Light	Other Accessories	3 kg
Tool Box Alloy (Empty)	Other Accessories	50 kg
80L Fridge (Empty)	Other Accessories	35 kg
Wagon - Rear Tyre Carrier (No Tyre)	Other Accessories	20 kg
Spare wheel	Other Accessories	40 kg
Draw System	Other Accessories	100 kg
Fuel Tank (Long range)	Other Accessories	90 kg
Fiberglass Canopy (rear)	Other Accessories	50 kg
Tray (Steel) UTE	Other Accessories	200 kg
Tray (Aluminium) UTE	Other Accessories	-100 kg

SUSPENSION KIT COMPONENTS

ADJUSTABLE PANHARD RODS

NOTE: Advisable when vehicle is raised above 50mm will assist lower applications by imparting better dynamic stability

WARRANTY TERMS & CONDITIONS

WARRANTY
No warranty claims will be considered if customer's account is outside our trading terms.

SHOCK ABSORBERS
The supplier will warrant all shock absorbers against defects in materials or faulty workmanship provided the shock absorbers have been correctly installed as recommended by the supplier with the correct spring listing. The following warranty periods apply from date of fitment, which ever occurs first.

Nitro - G series: 2 years/unlimited km

Nitro Max - NM series: 2 years/unlimited km

Predator - PR series: 2 year/unlimited km

COIL SPRINGS
All coil springs are warranted for a period of 2 years from faulty manufacture, breakage and sagging (being loss of unladen height of more than 10 mm).

LEAF SPRINGS
Leaf springs listed in this catalogue are warranted for a period of 12 months against faulty manufacture, breakage and sagging (being the loss of unladen camber by more than 12 mm).

SHACKLES AND PIN KITS
Spring shackles, pins and U-Bolts are covered by a 12 month warranty against defects in materials or faulty workmanship provided the products have been correctly installed. RAW 4x4 recommend that U-Bolts are retightened after initial 500 km's and are then checked at regular intervals.

POLYURETHANE BUSHES
All polyurethane suspension bushes are warranted to the original purchaser for a period of 2 years from date of purchase against defects in materials or faulty workmanship provided the bushes have been correctly installed.

RAW 4x4 recommend shackles and pins should be replaced when there is any evidence of severe rust or wear to optimise the life expectancy of the bushes.

TORSION BARS
All torsion bars are warranted to the original purchaser for a period of 12 months.

GENERAL
The above-mentioned warranties do not cover defects due to accident, misuse, improper installation; this includes neglect and wear and tear. The supplier excludes liability under this warranty for damage or wear of any component due to:

1. Incorrect installation of components
2. Products that have been modified or not used for the specified application as stated in the catalogue
3. Exceeding load specifications of the product
4. Incorrect information provided by the installer or customer
5. RAW 4x4 suspension products are designed for "normal" use and are in no way, covered under warranty should the vehicle be used in any form of extreme sports or competition racing.

It is the responsibility of the owner or driver of the vehicle to immediately notify the installer or place of purchase of the components of a possible warranty claim to prevent further damage to other components or compromise the safety of the vehicle.

Consequential damage costs and injury, however caused, are not covered under warranty; (written or implied). Warranty replacements will be despatched freight paid by the supplier or refunded at the original purchase price at the supplier's sole discretion.

The supplier's responsibility does not exceed the original purchase price of the product claimed to be defective. The supplier is not responsible for special, incidental or consequential damages, installation charges, labour charges or any other costs.

WARRANTY CLAIM PROCESS
Please contact the place of purchase or installation if you have a warranty concern.

To ensure your claim is processed as efficiently as possible the following information will be required:

- Description of concern
- Pictures of components and vehicle concern
- Measurements at time of installation and at the time of concern
- Date of fitment and kilometres travelled
- Proof of purchase
- Customer Warranty Registration Form

BACK ORDER
The customer will be advised if goods cannot be supplied ex stock at time of order and will be placed on back order and supplied as soon as goods are received by the supplier. Goods will remain on back order for a period of 60 days from placement of original order and will then be deemed to lapse, which may require re-ordering.

DISCLAIMER
Manufacturers names, part numbers, symbols or other references appearing in the RAW 4x4 Parts Catalogue are used for reference for order of goods only. All information supplied was correct, to the best of our knowledge, at the time of publication and is subject to change.

SHOCK & STEERING DAMPER ARMOR offers tough, long lasting protection for most shock absorbers

- TRIM TO FIT DIFFERENT LENGTHS
- FITS MULTIPLE BODY SIZES
- MADE IN USA
- QUICK INSTALLATION & REMOVAL
- UNIQUE ATTACHMENT METHODS ALLOWS

Constructed of durable thermoplastic polyurethane preventing pitting & dents to exposed shock absorbers & steering dampers. This unique reusable attachment method allows easy installation and removal for cleaning or maintenance.

RIDE HEIGHT MEASUREMENT / RIM TO GUARD / EYEBROW HEIGHT

Refer to page 130 of the RAW catalogue to see how to measure ride height correctly.
Take bump stop clearances on older leaf spring vehicles.

NOTE: THIS SECTION MUST BE COMPLETED AT THE 500km CHECK

CUSROMER'S DECLARATION:

I have read and accepted the RAW 4x4 Suspension Equipment conditions of Warranty outlined in this catalogue. I declare that the information supplied by me is true and accurate in every detail. I will carry out normal maintenance as required, i.e. Regularly check U-bolt tension and bush lubrication.

RAW 4x4

How to Measure

SHOCK ABSORBERS

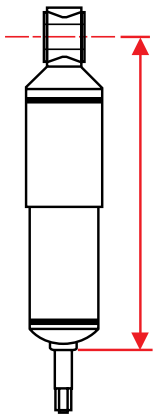

STEP 1: Determine the configuration of the shock absorber, see examples below.
STEP 2: Measure the fully extended and collapsed lengths from the points marked on the diagrams.

EYERING UPPER & LOWER MOUNTING

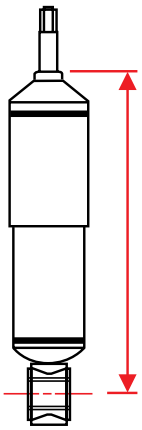

Measure from the centre of the top eyering to the centre of the bottom eyering.

EYERING UPPER & STUD LOWER MOUNTING

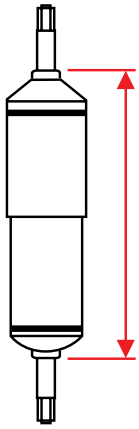

Measure from the centre of the top eyering to the base of the bottom stud.

STUD UPPER & EYERING LOWER MOUNTING

Measure from the base of the top stud to the centre of the bottom eyering.

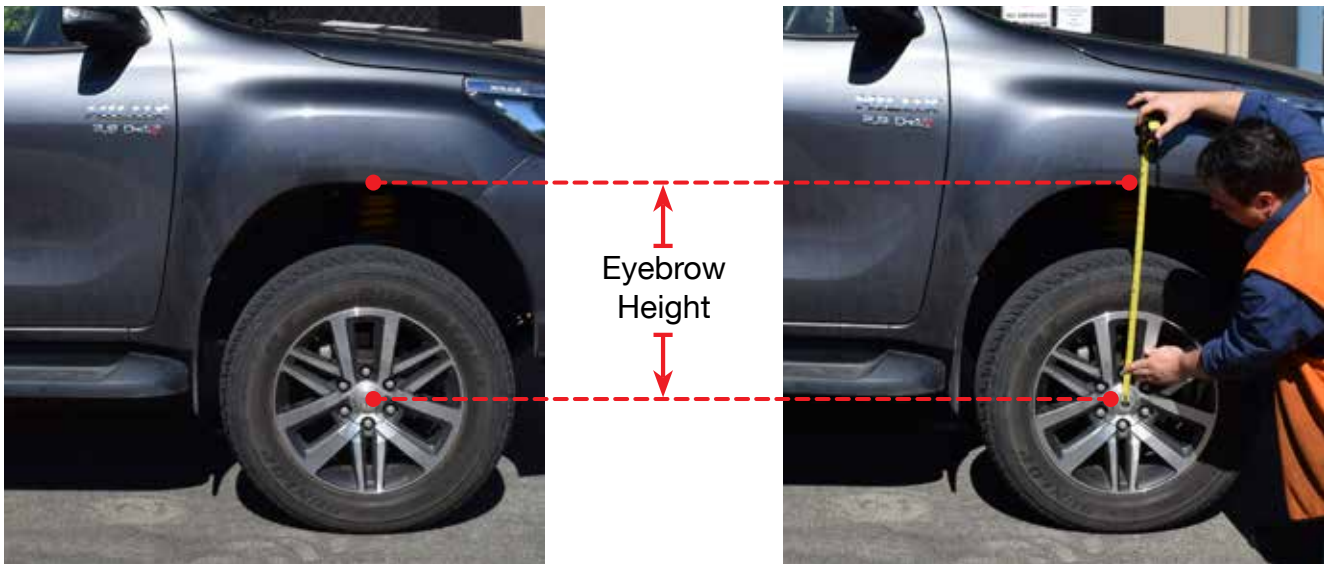

STUD UPPER & LOWER MOUNTING

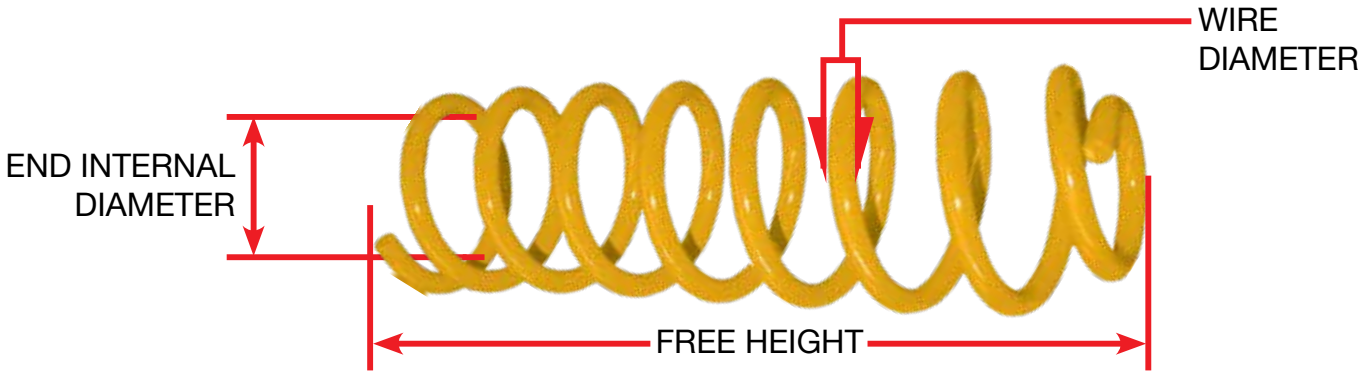

Measure from the base of the top stud to the base of the bottom stud.

MEASURING EYEBROW HEIGHT

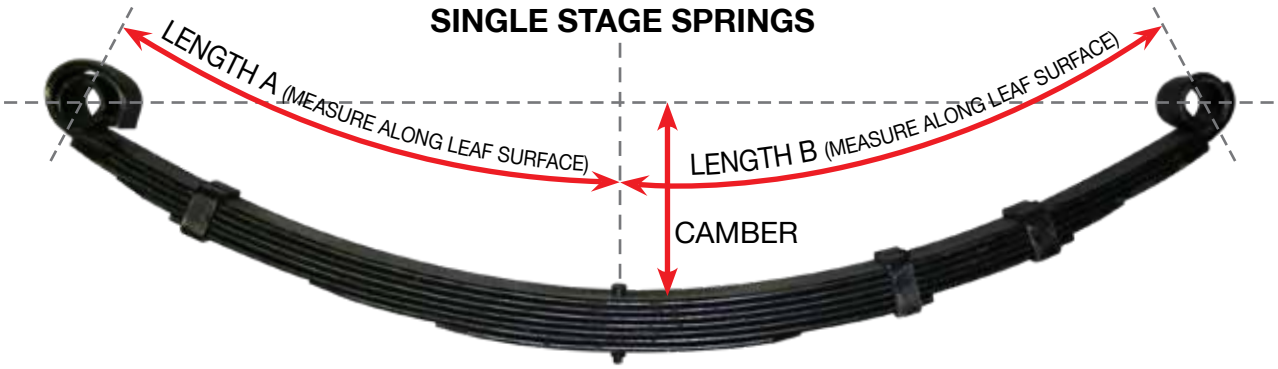

Before taking measurements make sure that the vehicle is fully unloaded and on a flat surface.
Measure the distance from the top centre point of the guard to the centre of the wheel.

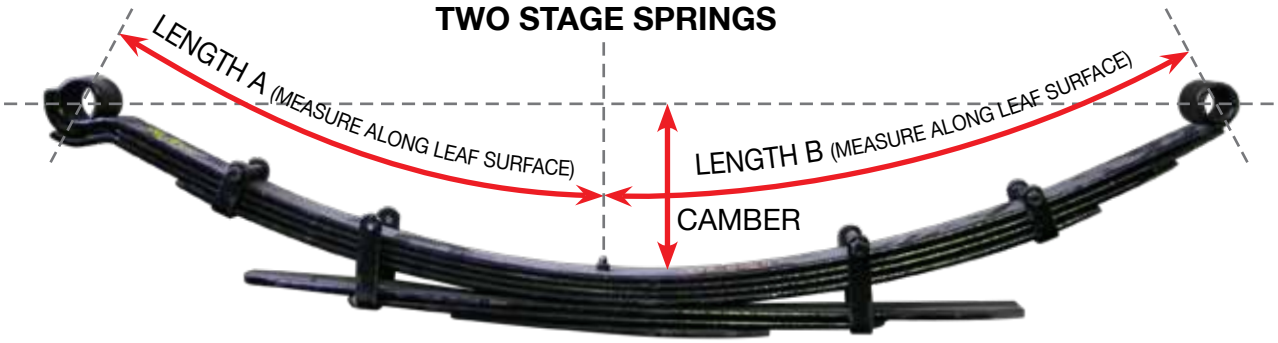

COIL SPRINGS

LEAF SPRINGS

SUSPENSION

☐ MODIFIED ☐ STANDARD

STEP 1: Check Static Height of shock absorber

This is done from centre of mounting point top to centre of mounting point bottom (refer drawing).

NOTE: Measure when vehicle unloaded and at kerb height.

STATIC HEIGHT

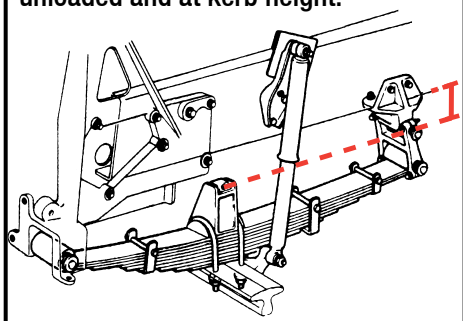

PLEASE NOTE DRAWINGS ARE FOR ILLUSTRATION PURPOSES ONLY

mm

STEP 2: Check Bump Stop clearance

This is done from lower side of rail to top of bump stop (refer drawing).

NOTE: Measure when vehicle unloaded and at kerb height.

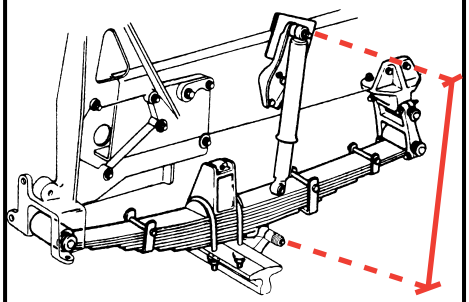

BUMP STOP CLEARANCE

PLEASE NOTE DRAWINGS ARE FOR ILLUSTRATION PURPOSES ONLY

mm

STEP 3: Check Full Extension of suspension

This is done by firstly disconnecting lower shock mounts then jack vehicle up, placing stands under rails, lowering suspensions down, then measuring from centre of mounting point to centre of mounting point (refer drawing).

EXTENSION HEIGHT OF SUSPENSION

PLEASE NOTE DRAWINGS ARE FOR ILLUSTRATION PURPOSES ONLY

mm

INDICATE BUSHING ☐ STEEL SLEEVED BUSHES INSTALLED ☐ PLAIN RUBBER/URETHANE BUSHES INSTALLED

SUSPENSION TYPE

☐ PARABOLIC

A paraboic spring can be made up of 2 to 3 leaves, with a gap in between each leaf. These leaves do not contact each other so there is no inter leaf friction.

☐ LEAF

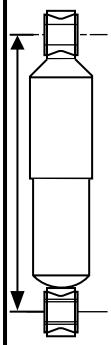

A multileaf spring pack can be made up of 5 to 12 leaves depending on the vehicle weight and the maximum load the vehicle is required to carry.
